Theme: Clinical Excellence

The prevention and Management of Pressure Injuries

Locations	Dates (0900 – 1600)	Venue
Wellington	Monday 7 th March	Amora Hotel - 170 Wakefield Street, Te Aro, Wellington
Christchurch	Wednesday 9 th March	Commodore Airport Hotel - 449 Memorial Avenue, Christchurch
Auckland	Friday 11 th March	Hotel Novotel Auckland Airport - Auckland International Airport

The DAA Group is delighted to offer a seminar with the spotlight on Pressure Injury (PIs) – prevention and management.

“As you may be aware HealthCERT is requiring providers to report, as an s31, all pressure injuries at stage 3 and above. Reporting is to cover all stage 3 PIs, stage 4 PIs, unstageable PIs and suspected deep tissue injury. Reporting is required irrespective of where the PI was acquired” (Source: HealthCert Bulletin November 2015).

Audit agencies are being asked to specifically report in your audit report on PI management at your facility.

This seminar is being designed and planned to assure and assist your practice.

- A key note speaker from the Ministry of Health who has been working with HQSC and ACC in relation to pressure injury prevention will set the scene, with the reason for the current focus in New Zealand and the impact that prevention and good management has on patient outcomes, and how international best practice and research has informed goals here.
- Pressure Injury Care experts from Auckland, Wellington and Christchurch will share their knowledge and expertise to prevent, grade and manage PIs with an emphasis on evidence based client support. The presentation will provide the opportunity for knowledge to be advanced in order to promote good health and ensure that the provider’s processes for Pressure Injury Prevention and Management (PIPM) meet best practice standards.
- A dietitian who has worked in conjunction with Pressure Injury Care experts will then link the importance of nutrition and hydration with prevention and PI management.

Six workshops will be on offer in the afternoon providing more in-depth education and tools for Pressure Injury prevention and management, nutrition support and using internal audit (tracer methodology) to assess and monitor your practice. Case studies will be used, including risk assessment documentation, initiatives, care planning and evaluation in order to assist providers with practical application.

We encourage you to register for this relevant and important seminar. Places are limited. Apply for leave, diary the event, book your travel and accommodation (where applicable) and please spread the word to others.
